World Knowledge Championship 2026 – Official Rules and Guidelines
Call for Applications 85 – Neurorights and Cognitive Governance
Area: Applied Neurosciences, Digital Ethics, and Technological Governance

Organizer: International Center for Quality Employment Intelligence, Civil Association (CIEC)

Official Platform: www.wksbusiness.com

INTRODUCTION

Call 85 – Neurorights and Cognitive Governance constitutes the most critical and visionary summons of the World Knowledge Championship 2026, established as the most prestigious global forum for developing ethical, legal, technological, and public policy frameworks designed to protect mental integrity, cognitive privacy, and human autonomy in the age of neurotechnologies. This competition brings together specialized jurists, neuroethicists, neuroengineers, data scientists, philosophers, legislators, and digital policy experts from over 1G5 countries, in an event strategically held in parallel with the FIFA World Cup 2026.

SCOPE OF THE CALL: FRAMEWORK DEVELOPMENT AND IMPLEMENTATION SOLUTIONS

This call is directed at two fundamental types of contributions for protecting the human mind in the 21st century:

1. FRAMEWORK AND NORMATIVE DEVELOPMENT PROJECTS (Track A): Research and proposals for creating legal frameworks, ethical principles, technical standards, and public policies aimed at regulating neurotechnologies, protecting neurorights, and ensuring fair and equitable cognitive governance.
2. TECHNOLOGICAL AND IMPLEMENTATION SOLUTION PROJECTS (Track B): Development of technological tools, algorithmic auditing systems, neurotechnology transparency platforms, decentralized governance models, and verification and compliance mechanisms in real-world environments.

Contestants must indicate in their registration the participation track that best defines the nature of their proposal.

THE GLOBAL CHALLENGE IN NEURORIGHTS AND COGNITIVE GOVERNANCE

The central purpose of this call is to identify, evaluate, and award the most innovative, rigorous, and viable proposals for protecting and governing the interaction between humans and technologies that access, interpret, or modify brain activity. Projects must address at least one of the following challenges:

1. Protection of Mental Privacy: Develop technical mechanisms and/or legal frameworks to prevent non-consensual access to neural data, thoughts, emotions, or preferences.
2. Preservation of Autonomy and Identity: Design safeguards against cognitive manipulation, algorithmic bias in brain-machine interfaces, and unwanted alteration of personality or decision-making.
3. Cognitive Equity and Justice: Create frameworks that prevent discrimination based on neurocognitive profiles and ensure equitable access to enhancement neurotechnologies.

4. Transparency and Explainability in Neuro-AI: Develop standards so that artificial intelligence systems processing brain signals are auditable, interpretable, and free from "black boxes."
5. International Governance and Dynamic Regulation: Propose models of global governance, transnational cooperation frameworks, and mechanisms for agile regulatory updating in the face of rapid neurotechnological advancement.

Projects must demonstrate measurable transformative impact potential in key indicators such as:

- Conceptual and Technical Innovation: Originality in the legal, ethical, technological, or governance approach.
- Methodological Rigor and Validity: Argumentative strength, scientific foundation, normative coherence, and empirical validation (where applicable).
- Implementation Feasibility: Consideration of relevant stakeholders, scalability, adaptability to different sociocultural contexts and regulatory frameworks.
- Ethical and Social Impact: Assessment of consequences, risk mitigation, focus on human rights and equity.

CLASSIFICATIONS AND PARTICIPATION AREAS

This call encompasses SIX specific classifications within the field of Neurorights and Cognitive Governance. Each contestant or team must select and register ONE SINGLE primary classification for their project.

85.1 LEGAL FRAMEWORKS AND LEGISLATIVE PROPOSALS IN NEURORIGHTS
Development of legislative texts, constitutional amendments, international treaties, or sectoral regulation codes.

Examples: Model law on neurorights for Latin American countries; amendment to the GDPR to include neural data as a special category.

85.2 APPLIED NEUROETHICS AND RESPONSIBLE DESIGN PRINCIPLES

Development of ethical frameworks, responsible design guidelines, ethics oversight committees, and impact assessment protocols.
Examples: Ethical framework for brain-computer interface experiments in workplace environments; guide for dynamic informed consent for neurotechnologies.

85.3 NEURAL PRIVACY AND SECURITY TECHNOLOGIES

Development of technical tools: encryption of neural data, anonymization systems, intrusion detection in neural interfaces, secure hardware.
Examples: Homomorphic encryption algorithm for EEG data in the cloud; wearable device alerting to unauthorized access attempts to brain signals.

85.4 AUDITING AND TRANSPARENCY IN NEURO-AI SYSTEMS

Creation of methodologies and software for auditing biases, explaining decisions, and verifying regulatory compliance in AI systems processing brain data.
Examples: Algorithm auditing platform for neuromarketing; visualization tool for decision-making in neural networks applied to psychiatric diagnoses.

85.5 COGNITIVE GOVERNANCE AND CITIZEN PARTICIPATION MODELS

Design of multi-level governance models, public participation mechanisms, citizen assemblies, and deliberation forums on neurotechnology policies.
Examples: Decentralized governance model (DAO) for the management of collective neural data; digital platform for public deliberation on the regulation of neuro-enhancements.

85.6 NEURORIGHTS IN SPECIFIC CONTEXTS: WORK, EDUCATION, AND JUSTICE

Solutions tailored to critical sectors: protection of workers from cognitive monitoring, student rights in neuro-education environments, and procedural guarantees in the use of neurotechnologies in courts.

Examples: Model labor contract clause protecting mental privacy; protocol for the admissible use of neuroimaging as evidence in a trial.

RIGOROUS AND TRANSPARENT EVALUATION SYSTEM

The call operates under a progressive, standardized multi-level system that begins at the municipal level, advances to the state level, continues on a national scale, and culminates in the World Grand Final. Each phase is evaluated by a specially convened Elite International Evaluation Committee for this call, comprised of the world's most prestigious neuroethicists, digital law jurists, neuroengineers, data scientists, philosophers, and technological public policy experts. This system guarantees rigorously scientific, technically sound, ethically impeccable, equitable, and completely transparent processes, implemented under the highest international standards via a digital platform that provides expert, detailed, and constructive feedback at each stage.

WHY PARTICIPATE IN THIS CALL?

Global Projection at the Frontier of Cognitive Liberty

You will compete with the architects of the frameworks that will define human dignity in the neurotechnological age. The championship consists of 8 progressive competitive phases culminating in an in-person World Grand Final in Mexico City, coinciding with the FIFA World Cup 2026.

Real-World Impact

Winning projects will be promoted before international bodies (UN,

UNESCO, OECD), national parliaments, and technology standards forums.

Elite Network and Council Membership
The top three winners of the World Grand Final will be automatically incorporated into the Global Council on Neurorights and Cognitive Governance of the World Knowledge Summit. They will participate in defining global principles and policy recommendations.

High-Impact Professional Ecosystem
Integration into international networks providing privileged access to institutions like the Neurorights Initiative, IEEE Neuroethics, regulatory agencies (FDA, EMA), and global think tanks.

Unique Experience in Parallel with the FIFA World Cup 2026
The top three winners will gain exclusive access to a meeting with FIFA Legends during the World Grand Final.

UNIQUE OPPORTUNITY: INTERNATIONAL TV PROGRAM "THE MIND IN THE DIGITAL AGE"
A random draw will select 5 participants to debate on a special globally broadcast program on topics central to neurorights and cognitive governance.

STRUCTURE OF THE 8 COMPETITIVE PHASES

PHASE 1 – MUNICIPAL

- Contestants: All registered participants from the corresponding municipality.
- Process: Upload of technical documentation + video to the platform. Three evaluation attempts. The highest score is retained.
- Result: One Municipal Champion is declared per municipality.
- Certification: Municipal Champion Certificate.

- **Payment Required: ✓ Municipal Phase Registration Fee.**

PHASE 2 – STATE

- **Contestants: All Municipal Champions from the state/province.**
- **Process: Optional update of materials. Three evaluation attempts by a specialized committee.**
- **Result: One State Champion is declared per state.**
- **Certification: State Champion Certificate.**
- **Payment Required: ✓ State Phase Re-registration Fee.**

PHASE 3 – NATIONAL

- **Contestants: All State Champions from the country.**
- **Process: Optional update. Rigorous evaluation by national and international committee.**
- **Results: 1st, 2nd, and 3rd National Place. The first-place winner advances to world phases.**
- **Certifications: Official National Place Certificate and National Champion Certificate (first place only).**
- **Payment Required: ✓ National Phase Re-registration Fee.**

PHASE 4 – WORLD BY CALL

- **Contestants: National Champions of Call 85 (Neurorights and Cognitive Governance) from all countries.**
- **Process: Competition among the best projects from each nation.**
- **Result: The World Champion of Call 85 – Neurorights and Cognitive Governance is declared.**
- **Payment Required: ✓ World by Call Phase Re-registration Fee.**

PHASE 5 – WORLD BY THEMATIC UNIT

- Contestants: World Champions from all calls in the "Applied Neurosciences, Digital Ethics, and Technological Governance" area.
- Process: Interdisciplinary competition among sector champions.
- Result: The World Champion of the Thematic Unit is declared.
- Payment Required: ✓ World by Thematic Unit Phase Re-registration Fee.

PHASE 6 – WORLD BY KNOWLEDGE AREA

- Contestants: World Champions of each Thematic Unit.
- Process: Competition among all areas of human knowledge.
- Result: The World Champion of the Knowledge Area is declared.
- Payment Required: Free of charge.

PHASE 7 – GLOBAL TOP 20 SELECTION

- Contestants: World Champions from all Knowledge Areas.
- Process: Exhaustive evaluation by a top-level committee.
- Result: The 20 Best Projects in the World (Global Top 20) are selected. Direct accreditation to the World Grand Final.
- Benefit: Exemption from remaining fees and automatic pass to the Grand Final.
- Payment Required: Free of charge.

PHASE 8 – WORLD GRAND FINAL

- Date: July 12, 2026.
- Venue: Mexico City, Mexico.

- Contestants: The 20 Best Projects in the World (Global Top 20).
- Format:
    1. Master Technical Presentation (15 min).
    2. In-depth Session on Implementation Pathways, Ethical Scrutiny, and Governance Models (20 min).
    3. Award Ceremony, Meeting with FIFA Legends, Networking.
- Payment Required: Free of charge for Top 20 qualifiers.

OPERATIONAL MODALITY

1. FORMAL PROJECT SUBMISSION

OFFICIAL REQUIRED FORMAT: TECHNICAL-PRINCIPAL DOCUMENT + PRESENTATION VIDEO

A) MAIN TECHNICAL DOCUMENT (Mandatory PDF)

Length: 25 to 50 pages. Recommended Structure:

1. Cover Page (Title, authors, track, classification).
2. Executive Summary (300 words, Spanish/English).
3. Introduction (problem statement, relevance, objectives).
4. Theoretical Framework / Methodology (legal theory, ethical principles, technical approach, research design).
5. Analysis / Development (detailed exposition of the proposal, framework, or tool).
6. Results / Proposed Solution (clear presentation of the outcome, model, or system).
7. Discussion (strengths, limitations, comparison with existing alternatives).
8. Conclusions and Recommendations.

G. References.

10. Appendices (including link to public repository if the project involves code/data).

B) PRESENTATION VIDEO (Mandatory MP4)

Duration: 6 to 8 minutes. Minimum 1080p resolution. Structure:

1. Introduction to the core challenge and its urgency (~1.5 min).
2. Core: Clear exposition of the proposed framework, solution, or tool. Use of diagrams, legal text excerpts, system demos, or case studies (~4 min).
3. Demonstration of its potential impact for protecting cognitive liberty and fostering responsible governance (~2 min).

2. EVALUATION SYSTEM BY INTERNATIONAL EXPERT COMMITTEE

Blind and standardized evaluation by the Elite International Evaluation Committee. Up to three attempts per phase with detailed feedback per criterion.

DETAILED EVALUATION CRITERIA AND WEIGHTING
TOTAL: 1,000 POINTS (100%)

- A. INNOVATION AND ORIGINALITY (300 points - 30%)
  - A1. Novelty of the proposed framework, solution, or tool in addressing neurorights challenges. (100 pts)
  - A2. Creativity in bridging disciplines (law, ethics, technology, policy). (80 pts)
  - A3. Potential to establish a new paradigm or reference point in the field. (70 pts)
  - A4. Forward-looking approach to emerging or anticipated neurotechnological risks. (50 pts)
- B. RIGOR AND SUBSTANTIVE STRENGTH (300 points - 30%)

    - B1. Quality of argumentation, logical coherence, and depth of analysis. (100 pts)
    - B2. Methodological soundness and appropriateness (legal, philosophical, technical, or empirical). (80 pts)
    - B3. Comprehensiveness in addressing complexities and counterarguments. (70 pts)
    - B4. Accuracy in citing relevant laws, ethical codes, scientific literature, or technical standards. (50 pts)
- C. FEASIBILITY AND POTENTIAL IMPACT (250 points - 25%)
    - C1. Realistic pathway for implementation, adoption, or deployment. (80 pts)
    - C2. Consideration of stakeholders, institutional barriers, and scalability. (70 pts)
    - C3. Potential for tangible, positive transformation in policy, practice, or individual protection. (60 pts)
    - C4. Identification of clear metrics for success and evaluation. (40 pts)
- D. ETHICAL AND GOVERNANCE CONSIDERATIONS (150 points - 15%)
    - D1. Centrality of human rights, autonomy, and justice in the proposal. (60 pts)
    - D2. Proactive identification and mitigation of ethical risks and social harms. (50 pts)
    - D3. Promotion of transparency, accountability, and democratic values in governance models. (40 pts)

AWARDS AND BENEFITS

WORLD FIRST PLACE

- Recognition: Trophy, Gold Medal, Official Diploma.
- Benefits: Honorary Membership in the Global Council; Guaranteed publication in a high-impact journal (e.g., ***Nature Human Behaviour***, ***Neuron***, ***Science and Engineering Ethics***); Full accreditation to the "World Winners Festival" in Dubai 2026; Comprehensive VIP Experience with FIFA Legends.

WORLD SECOND PLACE

- Recognition: Trophy, Silver Medal, Official Diploma.
- Benefits: 2-Year Membership in the Council; Executive summary publication; Accreditation to Dubai 2026; Access to VIP events with FIFA Legends.

WORLD THIRD PLACE

- Recognition: Trophy, Bronze Medal, Official Diploma.
- Benefits: 1-Year Membership in the innovation network; Certificate of Excellence; Accreditation to Dubai 2026; Access to FIFA Legends events.

GLOBAL TOP 20

- Recognition: Official "Global Top 20 World Knowledge Championship 2026 – Neurorights and Cognitive Governance" Certificate.
- Benefits: Participation in the in-person World Grand Final; Elite networking with global leaders in law, ethics, neurotechnology, and policy; International project dissemination; Exclusive written feedback from the final jury.

ELIGIBLE PROFILES

- Jurists and Legal Scholars.
- Neuroscientists and Neuroethicists.

- Philosophers and Ethicists.
- Engineers and Computer Scientists.
- Data Scientists and AI Ethics Researchers.
- Public Policy Specialists and Digital Governance Experts.
- Sociologists and Human Rights Professionals.
- Graduate Students (Master's/Doctoral) in Law, Neuroscience, Philosophy, Public Policy, Computer Science, Bioethics, or related fields.

Formats: Individual or in teams of up to 5 people (multidisciplinary collaboration is highly recommended).

KEY DATES

- Registration Opens: January 1, 2026
- Registration Closes: June 30, 2026 (12:00 PM, Mexico City time)
- World Grand Final: July 12, 2026 – Mexico City, Mexico

REGISTRATION PROCESS

1. Register at www.wksbusiness.com.
2. Select "Call 85 – Neurorights and Cognitive Governance".
3. Indicate Participation Track (A: Normative Frameworks / B: Implementation Solutions).
4. Choose ONE classification (85.1 to 85.6).
5. Complete the form and payment for Phase 1 (Municipal).
6. Upload PDF document and MP4 video to the platform. A link to a public repository is mandatory if the project includes code or datasets.
7. Confirmation via email.

ENROLL NOW AT: www.wksbusiness.com
INQUIRIES: dinamicaecc@gmail.com
OPENING: January 1, 2026
CLOSING: June 30, 2026 (12:00 PM, Mexico City time)
GRAND FINAL: July 12, 2026 – Mexico City, Mexico

"Where law protects the synapse, ethics guides the interface, and governance preserves the human essence. At the definitive frontier of liberty, Neurorights are constructed. Indispensable. Non-negotiable. Human."

CONVOCATORIA 85 - NEURODERECHOS Y GOBERNANZA COGNITIVA

CAMPEONATO MUNDIAL DEL CONOCIMIENTO 2026

Área: NEUROCIENCIAS APLICADAS, ÉTICA DIGITAL Y GOBERNANZA TECNOLÓGICA

Organiza: Centro Internacional de Inteligencia del Empleo de Calidad, Asociación Civil (CIEC)

Plataforma Oficial: www.wksbusiness.com

PRESENTACIÓN

La **Convocatoria 85 – Neuroderechos y Gobernanza Cognitiva** constituye la convocatoria más crítica y visionaria del Campeonato Mundial del Conocimiento 2026, consagrada como el foro global de mayor prestigio para el desarrollo de marcos éticos, jurídicos, tecnológicos y de política pública destinados a proteger la integridad mental, la privacidad cognitiva y la autonomía humana en la era de las neurotecnologías. Este certamen reúne a juristas especializados, neuroeticistas, neuroingenieros, científicos de datos, filósofos, legisladores y expertos en políticas digitales de más de 195 países, en un evento estratégicamente celebrado en paralelo al Mundial FIFA 2026.

ALCANCE DE LA CONVOCATORIA: DESARROLLO DE MARCOS Y SOLUCIONES DE IMPLEMENTACIÓN

Esta convocatoria está dirigida a dos tipos de contribuciones fundamentales para la protección de la mente humana en el siglo XXI:

1. PROYECTOS DE DESARROLLO DE MARCOS NORMATIVOS Y ÉTICOS (Track A):

Investigación y propuestas para la creación de marcos legales, principios éticos, estándares técnicos y políticas públicas destinados a regular las neurotecnologías, proteger los neuroderechos y garantizar una gobernanza cognitiva justa y equitativa.

2. PROYECTOS DE SOLUCIONES TECNOLÓGICAS Y DE IMPLEMENTACIÓN (Track B):

Desarrollo de herramientas tecnológicas, sistemas de auditoría algorítmica, plataformas de transparencia neurotecnológica, modelos de gobernanza descentralizada y mecanismos de verificación y cumplimiento normativo en entornos reales.

Los participantes deberán indicar en su inscripción la **track de participación** que mejor defina la naturaleza de su propuesta.

EL DESAFÍO GLOBAL EN NEURODERECHOS Y GOBERNANZA COGNITIVA

El propósito central de esta convocatoria es identificar, evaluar y premiar las propuestas más innovadoras, rigurosas y viables para proteger y gobernar la interacción entre humanos y tecnologías que acceden, interpretan o modifican la actividad cerebral. Los proyectos deben abordar al menos uno de los siguientes desafíos:

1. **Protección de la Privacidad Mental**: Desarrollar mecanismos técnicos y/o marcos legales para prevenir el acceso no consentido a datos neuronales, pensamientos, emociones o preferencias.
2. **Preservación de la Autonomía e Identidad**: Diseñar salvaguardas contra la manipulación cognitiva, el sesgo algorítmico en interfaces cerebro-máquina y la alteración no deseada de la personalidad o la toma de decisiones.
3. **Equidad y Justicia Cognitiva**: Crear marcos que prevengan la discriminación basada en perfiles neurocognitivos y aseguren el acceso equitativo a las neurotecnologías de mejora.
4. **Transparencia y Explicabilidad en Neuro-IA**: Desarrollar estándares para que los sistemas de inteligencia artificial que procesan señales cerebrales sean auditables, interpretables y libres de “cajas negras”.
5. **Gobernanza Internacional y Regulación Dinámica**: Proponer modelos de gobernanza global, marcos de cooperación transnacional y mecanismos de actualización normativa ágil frente al rápido avance neurotecnológico.

Los proyectos deben demostrar un **potencial de impacto transformador medible** en indicadores clave como:

- **Innovación Conceptual y Técnica**: Originalidad en el enfoque jurídico, ético, tecnológico o de gobernanza.
- **Rigor Metodológico y Validez**: Solidez argumentativa, base científica, coherencia normativa y validación empírica (cuando aplique).
- **Viabilidad de Implementación**: Consideración de actores relevantes, escalabilidad, adaptabilidad a distintos contextos socioculturales y marcos regulatorios.
- **Impacto Ético y Social**: Evaluación de consecuencias, mitigación de riesgos, enfoque centrado en los derechos humanos y la equidad.

CLASIFICACIONES Y ÁREAS DE PARTICIPACIÓN

Cada participante o equipo debe seleccionar **UNA ÚNICA clasificación principal** para su proyecto:

85.1 MARCOS LEGALES Y PROPUESTAS DE LEY EN NEURODERECHOS

- Desarrollo de textos legislativos, enmiendas constitucionales, tratados internacionales o códigos de regulación sectorial.
- Ejemplos: Ley modelo de neuroderechos para países latinoamericanos; enmienda al GDPR para incluir datos neuronales como categoría especial.

85.2 NEUROÉTICA APLICADA Y PRINCIPIOS DE DISEÑO RESPONSABLE

- Elaboración de marcos éticos, guías de diseño responsable, comités de supervisión ética y protocolos de evaluación de impacto.

- Ejemplos: Marco ético para experimentos de interfaz cerebro-computadora en entornos laborales; guía de consentimiento informado dinámico para neurotecnologías.

85.3 TECNOLOGÍAS DE PRIVACIDAD Y SEGURIDAD NEURONAL

- Desarrollo de herramientas técnicas: encriptación de datos neuronales, sistemas de anonimización, detección de intrusiones en interfaces neurales, hardware seguro.
- Ejemplos: Algoritmo de encriptación homomórfica para datos de EEG en la nube; dispositivo wearable que alerta de intentos de acceso no autorizado a señales cerebrales.

85.4 AUDITORÍA Y TRANSPARENCIA EN SISTEMAS NEURO-IA

- Creación de metodologías y software para auditar sesgos, explicar decisiones y verificar el cumplimiento normativo en sistemas de IA que procesan datos cerebrales.
- Ejemplos: Plataforma de auditoría de algoritmos en neuro-marketing; herramienta de visualización de la toma de decisiones en redes neuronales aplicadas a diagnósticos psiquiátricos.

85.5 GOBERNANZA COGNITIVA Y MODELOS DE PARTICIPACIÓN CIUDADANA

- Diseño de modelos de gobernanza multinivel, mecanismos de participación pública, asambleas ciudadanas y foros de deliberación sobre políticas neurotecnológicas.
- Ejemplos: Modelo de gobernanza descentralizada (DAO) para la gestión de datos neuronales colectivos; plataforma digital de deliberación pública sobre regulación de neuro-mejoras.

85.6 NEURODERECHOS EN CONTEXTOS ESPECÍFICOS: TRABAJO, EDUCACIÓN Y JUSTICIA

- Soluciones adaptadas a sectores críticos: protección de trabajadores frente a monitorización cognitiva, derechos de estudiantes en entornos de neuro-educación, y garantías procesales en el uso de neurotecnologías en tribunales.
- Ejemplos: Cláusula modelo de contrato laboral que protege la privacidad mental; protocolo para el uso admisible de neuro-imágenes como prueba en un juicio.

SISTEMA DE EVALUACIÓN RIGUROSO Y TRANSPARENTE

La convocatoria opera bajo un sistema multinivel progresivo y estandarizado (municipal, estatal, nacional, mundial), evaluado por un **Comité Evaluador Internacional de Élite** integrado por los más prestigiosos neuroeticistas, juristas en derecho digital, neuroingenieros, científicos de datos, filósofos y expertos en políticas públicas tecnológicas del mundo. Se garantiza un proceso **científico, técnicamente sólido, éticamente impecable y transparente**, con retroalimentación experta en cada fase.

¿POR QUÉ PARTICIPAR?

- **Proyección Global**: Compite en 8 fases progresivas que culminan en la **Gran Final Mundial presencial en Ciudad de México**, coincidiendo con el Mundial FIFA 2026.
- **Impacto Real**: Los proyectos ganadores serán promovidos ante organismos internacionales (ONU, UNESCO, OCDE), parlamentos nacionales y foros de estándares tecnológicos.
- **Red de Élite**: Los tres primeros lugares serán incorporados al **Consejo Global de Neuroderechos y Gobernanza Cognitiva** de la Cumbre Mundial del Conocimiento.

- **Vinculación Profesional**: Acceso privilegiado a instituciones como el NeuroRights Initiative, IEEE Neuroethics, organismos regulatorios (FDA, EMA) y think tanks globales.
- **Experiencia Única**: Encuentro exclusivo con **Leyendas de la FIFA** y participación potencial en el programa internacional de TV "**La Mente en la Era Digital**".

ESTRUCTURA DE LAS 8 FASES COMPETITIVAS

1. **FASE MUNICIPAL**: Inscripción, carga de documento + video. Mejor puntaje avanza.
2. **FASE ESTATAL**: Competencia entre campeones municipales.
3. **FASE NACIONAL**: Selección de 1°, 2° y 3° lugar nacional. El primero avanza.
4. **FASE MUNDIAL POR CONVOCATORIA (85)**: Campeón Mundial de Neuroderechos.
5. **FASE MUNDIAL POR UNIDAD TEMÁTICA**: Competencia interdisciplinaria del área.
6. **FASE MUNDIAL POR ÁREA DEL CONOCIMIENTO**: Competencia entre todas las áreas.
7. **SELECCIÓN GLOBAL TOP 20**: Elección de los 20 mejores proyectos del mundo.
8. **GRAN FINAL MUNDIAL (12 julio 2026, CDMX)**: Presentación magistral, sesión de profundización y ceremonia de premiación.

MODALIDAD OPERATIVA

1. FORMATO OFICIAL DE PRESENTACIÓN:

- **Documento Técnico-Principal (PDF, 25-50 páginas)**: Debe incluir portada, resumen, introducción, marco teórico/metodología, análisis, resultados, discusión, conclusiones, referencias y anexos (incluyendo enlace a repositorio público si aplica).
- **Video de Presentación (MP4, 6-8 min, 1080p)**: Introducción al problema, exposición clara de la propuesta y demostración de su impacto potencial.

2. **EVALUACIÓN POR COMITÉ INTERNACIONAL (1000 PUNTOS)**:

- **A. Innovación y Originalidad** (30%): Novedad del marco, solución o herramienta propuesta.
- **B. Rigor y Solidez** (30%): Calidad argumentativa, metodológica y técnica.
- **C. Viabilidad e Impacto Potencial** (25%): Posibilidades reales de implementación y transformación.
- **D. Aspectos Éticos y de Gobernanza** (15%): Consideración de derechos, equidad, transparencia y justicia.

PREMIACIÓN Y BENEFICIOS

- **PRIMER LUGAR MUNDIAL**: Trofeo, Medalla de Oro, Diploma. Membresía Honoraria en el Consejo Global, publicación garantizada en revista de alto impacto (ej. *Nature Human Behaviour*, *Neuron*), acreditación completa al "Festival Mundial de Ganadores" en Dubái 2026, experiencia VIP con Leyendas FIFA.
- **SEGUNDO Y TERCER LUGAR**: Trofeo, medalla, diploma, membresías en redes de innovación, acreditación a Dubái 2026, acceso a eventos VIP.

- **TOP 20 GLOBAL**: Certificado oficial, participación en la Gran Final Mundial, networking de élite, difusión internacional y retroalimentación del jurado.

PERFILES ELEGIBLES

Juristas, neurocientíficos, filósofos, ingenieros, científicos de datos, especialistas en políticas públicas, éticos, sociólogos, profesionales de derechos humanos y estudiantes de posgrado en áreas afines. **Modalidad individual o en equipos de hasta 5 personas** (recomendado multidisciplinario).

FECHAS CLAVE

- **Apertura de Inscripciones**: 1 de enero de 2026
- **Cierre de Inscripciones**: 30 de junio de 2026 (12:00 PM, hora Ciudad de México)
- **Gran Final Mundial**: 12 de julio de 2026 – Ciudad de México, México

---

PROCESO DE INSCRIPCIÓN

1. Registrarse en www.wksbusiness.com.
2. Seleccionar "**Convocatoria 85 – Neuroderechos y Gobernanza Cognitiva**".
3. Indicar **Track de Participación (A o B)**.
4. Elegir **UNA clasificación (85.1 a 85.6)**.
5. Completar formulario y pago de la **Fase 1 (Municipal)**.

6. Subir **documento PDF** y **video MP4** a la plataforma (enlace a repositorio público es obligatorio si el proyecto incluye código/datos).
7. Confirmación vía email.
